

VISUALLY IMPACTFUL

OUR STORY

Ambika Creative Collection is a modern, dynamic ceramic firm that's constantly striving to blur the lines between tiles and art with its extensive range of religious-themed tiles, decorative wall tiles, and other ornamental concepts such as the stunning decorative borders that adds a unique character and style to the overall design. Beautifully printed, our collection of decorative products perfectly captures the artistic essence while being highly functional.

Our products are highly versatile and usable for multipurpose applications: use them to create a statement wall, or a fantastic pooja room, or a breath-taking living room. Every product is made using our state-of-the-art technology which is subject to recurring innovation and diligent inspections to churn out products that are both high on aesthetics and quality.

BREEZE BLOCK COLLECTION

WE CAN APPLY WATER BASED
PAINT OF YOUR CHOICE

Installation Method:

- First method: It is very simple it looks like constructing bricks using cement mortar or tile adhesives, You can stack one on another and make wall of jallis.
- Second method: Actually an extension of first method if the span and the height is more you can have stiffeners in between the jallis its self weight but in order to compensate the lateral force somebody is pushing or leaning to the jallis. To have an extra mechanical support. You need have extra stiffeners between. Stiffeners can use between every three or four rows of jallis and it should be connected to both ends, either to the column or MS support you are having in the both ends of the frame.
- Third method: You can make a grid of 200 mm x 200 mm and place jalli inside that.

Note: As property of stone there may be a size variation of + or-2 mm jalli to jalli.

Important note for Jallis:

- As property of stone there may be a size variations of + or-2 mm jaali to jaali.
- An important factor you have to consider while constructing jallis is make sure you clean after every few courcers of jallis because it will become very difficulty to clean it.
- As per your design requirement you can have may be 3 or 4 mm grove in between even jallis or else you can have use the thinnest may be 1 mm tile adhesive between each jallis.

Finishing Jallis:

The jallis can also be painted in any colour of your choice and we recommend to have primer before you paint it for better Finishing. You have to manage this in the gap between the jallis in tile adhesives or cement.

200 x 200 x 60 mm
8 x 8 x 2.5 inches

BREEZE BLOCK COLLECTION

Connect to frame
or columns at both
the ends.

40mm x 5mm
MS Flat

Wall,
Concrete,
Column or
MS Column.
